File: Switching Limits

Mr. R.L. Marceau
Assistant General Chairman UTU
332 Minnesota Street
Suite W-952
Saint Paul, MN. 55101

Mr. J.D. Fitzgerald
General Chairman UTU
The Academy #217
400 East Evergreen Blvd.
Vancouver, WA. 98660

Gentlemen,

A new grain yard is currently under construction in Pasco, Washington, and it is anticipated that this facility will be operational by September 1, of this year. When construction is completed, the existing general switching limits will be close to the middle of the new yard.

I understand that the UTU Local Chairmen and the Superintendent have identified locations for new general switching limits that are acceptable.

Therefore, this letter will serve to confirm that effective August 15, 1995, the General Switching Limits at Pasco, Washington will be modified to the extent listed below:

Burbank Subdivision -- Milepost 2.9
Old Martindale Branch -- to the east siding switch at Martindale, Milepost 238.3

Except as specifically modified by this letter of understanding, any other existing general switching limits remain unchanged.

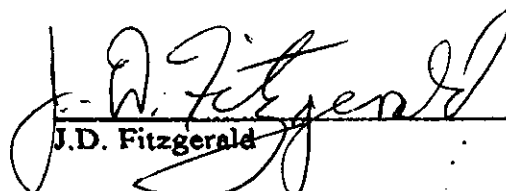

If the foregoing is acceptable, please so indicate in the space provided below.

Sincerely,

Accepted:
